### -B Handle Spear-

- \*With a thin spear-like tip can insert in narrow periodontal membrane cavity easily, and periodontal ligament fibers are cut and it exfoliates.
- \*Excellent for immediate implantation.

Autoclavable up to 135°C  
OK

\*Since this product is an instrument which cuts a periodontal ligament and carries out extraction of a tooth by wedge action, the blade is very thin. Therefore, please do not perform operation in which a root is raised by leverage, there are possibility of the breakage of blade and fear of distortion.

- \*The curve of the tip can approach the "molar" smoothly.

- \*Inside curve of the tip can approach the end of molar, lingual and palate side.

- \*This curved shape of a shank is suitably effective for "molar" to approach with ease.

- \*The tip is positioned on the extended line of the handle for handling balance. It makes Dr. comfortable to keep the balance of operation.
